"

"

time for it.

3. & that he is quite  
paralyzed at times"  
(I think she said  
"unconscious". But am  
not quite certain of  
that last word.)

Do please tell me  
the truth, & quickly.

She said "not to  
worry him" (He is now  
the "boss" of this Reserve  
& of David Chapurula  
& me. & I am delighted).

She was the very  
opposite of what I

2. & (because it distresses  
me so much - & I  
hope is untrue) to  
ask you IS it true?

- what Mr. Barclay  
told me & asked  
me "not to mention  
it." - And I won't  
except to you -  
as I MUST KNOW.

She said Mr Barclay  
has "Parkinson's Disease"  
(which I think is "softening  
of the brain" & then paralysis  
& death) ?

4 expected!!! She came here  
one evening.

of course. much younger & nice  
looking (in a hard way):

mensabnt!!!)

I hope all is well  
with you (both <sup>in</sup> work  
& <sup>in</sup> health). Please do

own sincerely
